

CLAIMS

We claim:

1. A male sexual aid device, comprising:

a sleeve having a head, a shaft and a base portions;

a first strap having two ends;

a second strap shaped as a closed ring;

wherein said sleeve having a cutout along its whole length, said first strap is secured by said two ends to said base portion of said sleeve in a location opposite to said cutout, said second strap is secured to said shaft portion outside said sleeve and embraces said shaft portion, said base portion is slanted to an angle toward said shaft portion about an axis located in said cutout in a middle of said base portion, and said location of said two ends of said first strap is interconnected with said angle in a way that being rotated 90 degrees from a position alongside and out said sleeve toward said cutout said first strap intersects said axis of said slant.

2. A device as recited in claim 1, wherein said head portion is shaped alike a glans with a corona sulcus of a penis, said base portion is shape as a narrow bead, said two ends of said first strap are secured in a middle of said bead, and said shaft portion is the longest and thinnest portion of said device.

3. A device as recited in claim 1, wherein said sleeve is made of thermoplastic.

4. A device as recited in claim 1, wherein said first and second strap are made of elastomeric material.

5. A device as recited in claim 1, wherein a thickness of said sleeve is such that some flexibility is provided for forces applied inside out of said sleeve to widen said cutout, and rigidity is provided for forces applied to bend said sleeve alongside.
